SmartReFlex: The way to 100% renewable district heating and cooling

Smart and flexible 100% renewable district heating and cooling systems for European cities

SmartReFlex regions

Smart and flexible 100% renewable district heating and cooling systems for European cities

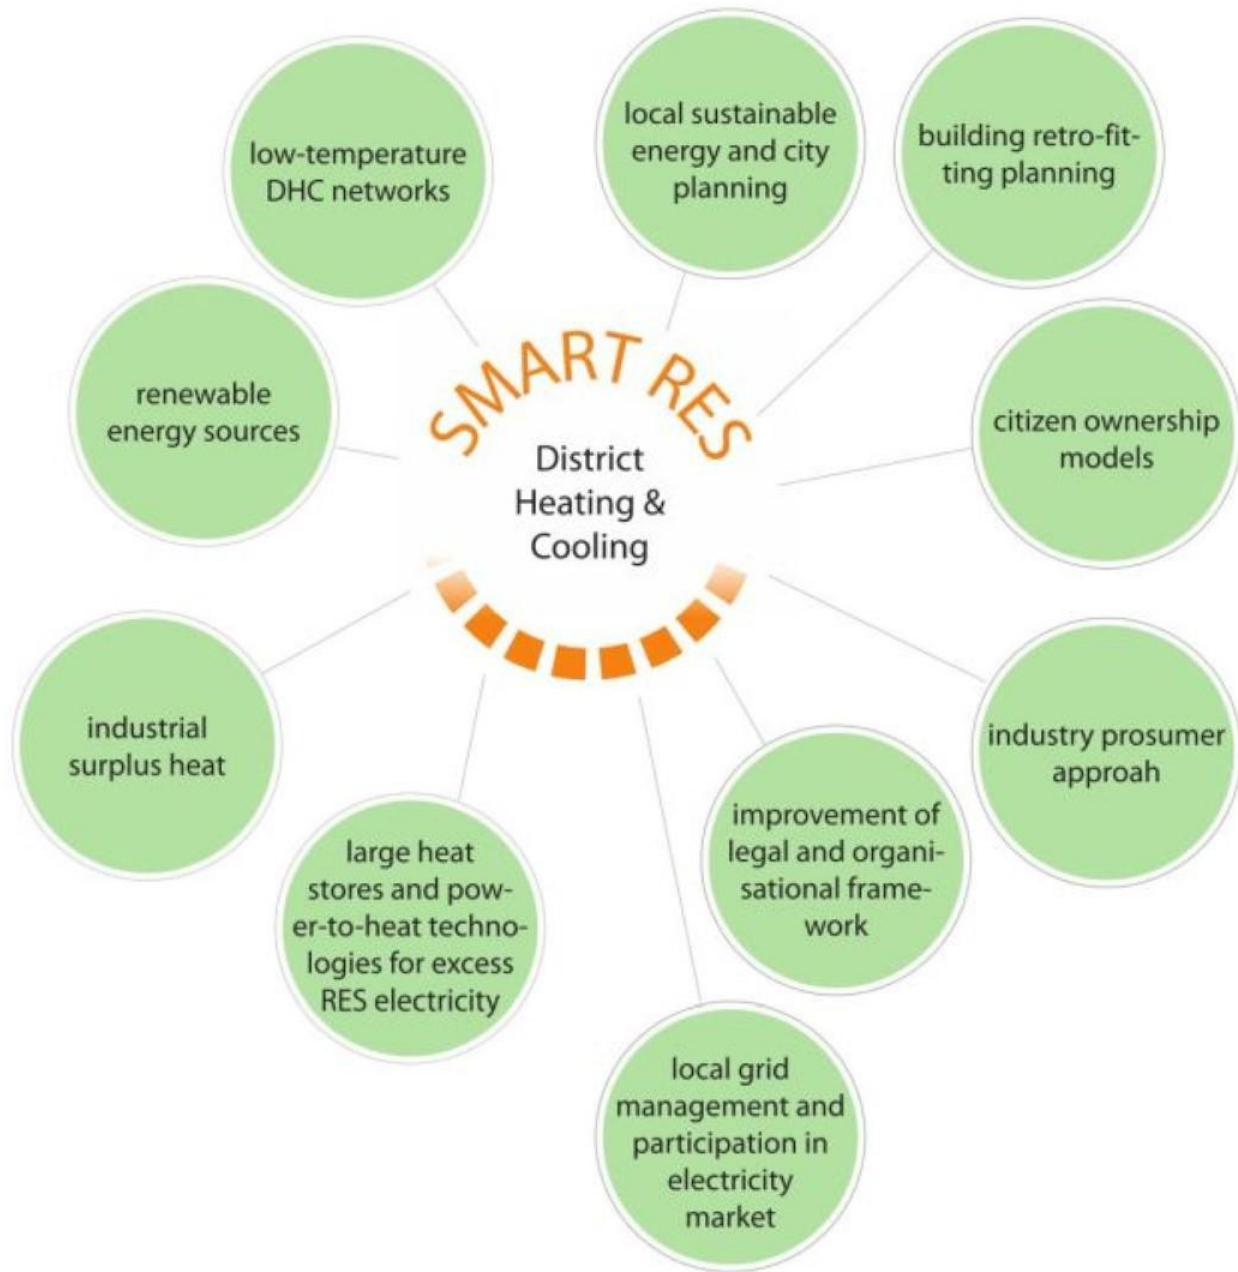

Set up a regional task force with all key stakeholder

Organize capacity building workshops with regional and national stakeholders including technical and management staff, designer, planner, customer and so on.

100%
RES DHC

Learn from experienced experts and consultants in technical as well as in non-technical fields, also from abroad.

Involve the regional authority or an equal representative with responsibility for implementation in order to guarantee a successful implementation.

Smart and flexible 100% renewable district heating
and cooling systems for European cities

- **Guide for regional authorities:** Knowledge and inspiring examples on RES DHC for Local Authorities and communities - residents, commercial and industrial enterprises
- **Recommendations for setting up a task force on RES DHC:** How to effectively involve all local stakeholders for carrying out a fruitful process towards 100% RES DHC
- **6 regional strategies:** Action plans for 100% RES DHC in the participating Regions
- **Training material:** more than 500 people were trained through national workshops on three different topics (design & planning, technical issues, organization and financing)
- **20 case studies:** Feasibility studies on real plants at local level and / or policies on RES DHC
